

Environmental Policy

Executive management at CA Amalgamated Metal (M) Sdn. Bhd. actively supports the protection of the environment and recognises the role that recycling plays in conserving natural resources.

Our business objective is to sustain the highest standard of environmental management throughout the Company's operations. To achieve this objective, our business strives for continual improvement in our environmental performance, the efficient use of resources and the minimisation or prevention of pollution.

The organisation will at all times undertake the following activities:

- Strive to achieve industry best practice.
- Ensure environmental performance will meet or exceed regulatory requirements.
- Regularly monitor the organisation's performance, objectives and targets, ensuring that support functions exist to effectively maintain and continually improve environmental standards.
- Ensure that all employees, contractors and sub-contractors engaged by this organisation will act in an environmentally responsible manner and will be instructed and trained accordingly.
- Control and manage environmental risks from its operations by implementing systems to identify, assess, control and monitor those environmental risks.
- Efficiently utilize resources such as energy, water, raw materials and consumables, ensuring the amount of waste generated will be minimized to the extent practicable.

To achieve the Environmental objectives of the organisation, there is a clear requirement for all management and employees to comply with this policy. Executive management will actively encourage the implementation of these principles within their areas of the business and ensure that all Environmental Procedures implemented by the organisation are executed accordingly.
